Monet Pastel Bonus Project

Now that you have learned some pastel techniques, why not work on your own *actual* outdoor drawing?

This can definitely feel intimidating but, here are some steps to get you started.

Take the smaller mixed media paper, pastels, and the charcoal stick outside. If this isn't possible, find a picture from nature that you would like to recreate. Very lightly, draw the main shapes of the view as shown in the pictures below.

Next, fill in the colors with your pastels. Use the skills that you learned in this lesson. Start with the background and use a wipe or your fingers to blend it a bit.

We will accept photos of this bonus project for our monthly contest described on the back of this manual.
