PRINTMAKING

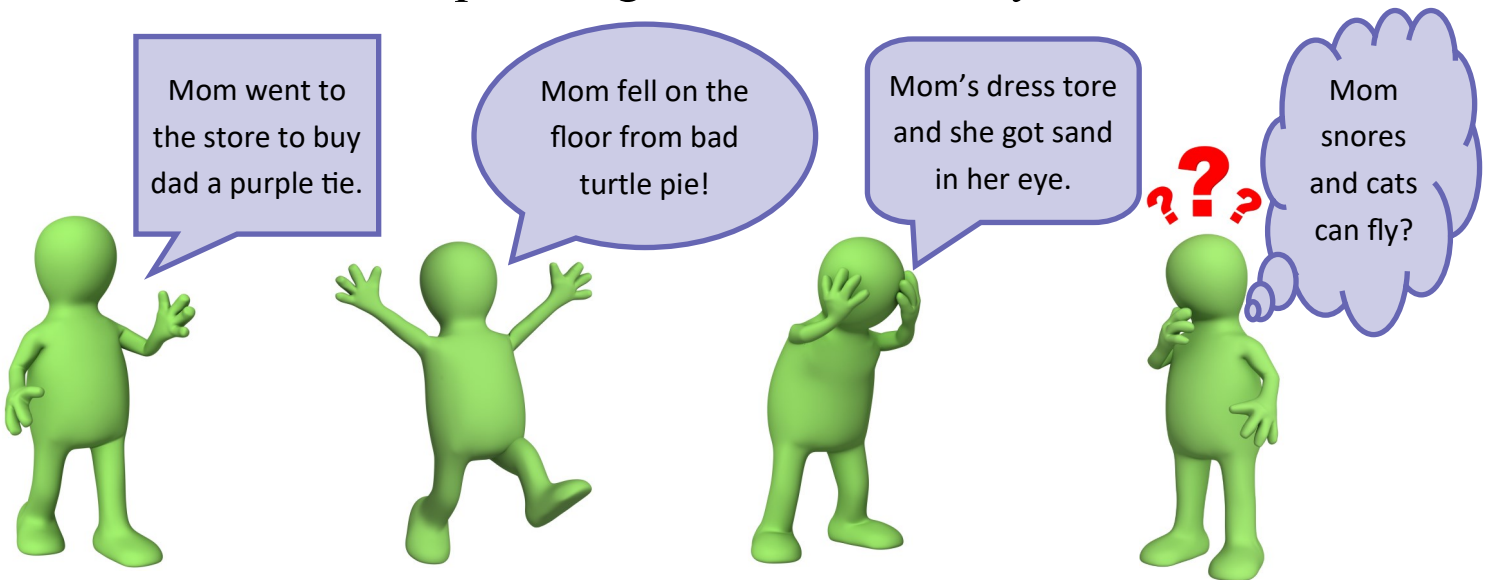

You probably don't think about printing very often but, if you look around, you will see it everywhere. The labels on your crayons, books, cards, magazines, money, cereal boxes, THIS MANUAL!

But can you imagine the world before printing?

How do you think important news would spread without printing? People would have to spread the news by word-of-mouth. This was before cars were invented, let alone airplanes. This news certainly wouldn't go very far!

Also, think about what kind of mistakes might be made when spreading the news this way.

A lot of things changed after the invention of the printing press. Please visit [MoxieBoxArt.com/moxie-u](https://www.MoxieBoxArt.com/moxie-u) if you would like to learn more about print as an artform and the history of printmaking.
