M.C. ESCHER

Did you know that M.C. Escher made over 2,000 drawings in his lifetime? He also made over 400 prints. He must have REALLY loved his work.

He was fascinated with tessellations and said, *“It remains an extremely absorbing activity, a real mania to which I have become addicted, and from which I sometimes find it hard to tear myself away.”*

Although he was famous for his tessellations, he also created some amazing optical illusion art. He incorporated math into his art and created drawings of impossible realities.

We have linked a fabulous NPR video about this amazing artist at Moxieboxart.com/moxie-U
